# COLDTAINER

## PORTABLE STORAGE SOLUTIONS

A flexible and economical solution for temperature-controlled transport needs.

We offer several mobile storage units that can safely transport temperature-sensitive products in any environmental condition. In the pharma industry, they can become a blood transport cooler or portable vaccine refrigerator. For food delivery, they can keep pre-cooked meals hot or groceries cold.

These containers are also a less expensive alternative to a refrigeration conversion of a truck or van. They do not require a van liner install or a refrigerated van build. They are easy to load and unload, allowing the unit to be removed from the vehicle, and come in convenient front opening or top loading models.

### Bluetooth Added for Total Connectivity and Visibility

All Coldtainer containers can be equipped with Bluetooth connectivity and accessed by a downloadable APP allowing you to monitor the unit from a linked smartphone or tablet and upload reports and temperature graphs.

- Turns your mobile device into a wireless user interface.
- Precise temperature set-point control.
- Easy viewing of temperature and status without opening container.

### EASY INSTALLATION

Coldtainer containers are a one-piece molded polyethylene construction for outstanding durability, strength and lightness. Components are designed and tested for use in mobile applications.

## APPLICATIONS

### FOOD DELIVERY

Perfect for any scale delivery or vending operation. Coldtainer refrigeration units are durable and designed to withstand vibrations related to vehicle use. Available in hot and cold models, they are made from highly durable polyethylene and food grade, materials, are easy to clean, and meet all health and safety standards.

### PHARMACEUTICAL

Whether you need a blood transport cooler, a portable vaccine refrigerator, the cooled transport of biological samples, or a mobile, temperature-controlled, shipping unit for vaccines and medicines, we have you covered. Design and technical features meet all CDC/VFC vaccine storage guidelines.

### LOGISTICS

With their modular convenient design, Coldtainers are often superior to traditional shipping methods for temperature sensitive items, allowing you the freedom to ship both perishable and nonperishable items at once. These units also eliminate the need for refrigerated vehicles to streamline your shipping process.

## ADVANTAGES

- INDUSTRY LEADING INSULATION
- RESISTANCE TO VIBRATIONS
- LOW ENERGY CONSUMPTION
- VERSATILITY
- FLEXIBILITY
- VERY LONG WORKING LIFE
- FOOD-SAFE DESIGNED INTERIOR, FOR EASY CLEANING
- BLUETOOTH DATA TRACKING (OPT)
- AUTONOMOUS OPERATION (OPT)

# COLDTAINER HmL

## Not Just for Cold Deliveries! Coldtainer Goes Hot Too

The Coldtainer HmL series offers restaurants or caterers a versatile high-performing unit that comes with a heated option with a range up to 185 degrees F.

With its sleek and rugged design, iso-thermal triple insulated construction, and precise temperature control, the Coldtainer HmL is designed for catering and food service experts to transport hot meals on the road, while guaranteeing the taste, quality, and safety from the place of preparation to the customer.

# COLDTAINER AuO

## Coldtainer on the Go. Take Your Unit Where You Need It

Coldtainer Autonomous Units include an integrated battery, enabling autonomous operation for up to 12 hours on a single charge without the need to be plugged in.

Perfect for events or areas where outside power source is unavailable. Coldtainer AuO units come in many different versions with units able to refrigerate, freeze, or deep freeze items depending on required temperature set point.

## OPTIONAL UPGRADES

We offer a wide range of upgrades to cater for different applications.

- 1 Shelf
- 2 Transport Kits
- 3 Bluetooth Module
- 4 Plastic Strip Curtain
- 5 Fixing Kit/Tie Down Kit
- 6 Internal Fan Kit
- 7 AC/DC Converter
- 8 Handle Lock Kit
